

21 JUNE 2013

SINGULARITY

I have had several questions regarding the esoteric singularity that has manifested from 21 June 2013.

Chart of Singularity Energy - 21 June 2013

21 June 2013

This is indeed a time of reflection and of contemplating that which has been, and that which yet might be - and it is a time of intense sensitivity, empathy, and yearning for a long forgotten but haunting ideal. All this is linked to a natural psychomagnetheric singularity which has been forming for some time (formation started late November 2009), and finally "opened/ruptured" on the 21st June 2013. Now that the singularity has fully opened, it will be self-sustained for some time to come. This is an

unprecedented converging event and it will greatly amplify the esoteric principle that "nothing, absolutely nothing, is as it seems"; and from 21 June 2013, it will indeed be all smoke and mirrors, and the cycle will run its course until 26 October 2026.

How will the singularity specifically affect people?

For those individuals "in tune" with the singularity (e.g. homo spiritus, and other empaths and sensitives - these are part of a group which comprises 2% of 2% of the human collective), it opens a sympathetic convergent vortex through a folded continuum reality which directly links the past (personal - microcosm, and collective - macrocosm) with the present, and creates a conduit of transformative esoteric energy (personal and collective) that transcends space and time. Consequently, the Collective Consciousness/Akashic Records (including: the Hidden History) are open to perusal, and the individual can re-confirm who they are (including: the Home World, The Cohorts, The Great Rebellion, The Great Crossing, the Great Experiment, The Cohort Wars, The Ensuing Disaster), and review "when, where, why and what, etc" - their chosen experiential realities and the consequences thereof, which have accreted into both the personal and collective manifested now. This, in turn, opens, to the individual, potential self-determined cycles of yet an un-chosen or un-realised experiential reality. In other words, if correctly understood and applied, this available energy can be transformed into limitless experiential possibilities that can be achieved or manifested as physical reality. What makes this so significant is the fact that for the first time in countless millennia an individual could actually develop the spiritual motor primacy to truly embark upon a self-determined cycle.

We are dealing here with a potent and unprecedented energy manifestation; and consequently, it is essential that the individual's subconscious/spiritual components be carefully prepared and aligned/synchronised with this new energy outpouring. Why? Unfortunately, if an individual does not attune themselves correctly to this new energy and channels thereof, their life-force energy will be distorted/attenuated/depleted and dis-ease, and eventually even death could occur. Hence the dramatic increase of worldwide illness and death since February 2012 - these are linked to the developing singularity and the incorrect application of chemical medicants. Unfortunately, the singularity continues to attenuate health energy, and it is interesting to note that the current predominant cause of death, in the west, is pneumonia/respiratory and kidney failure (even though other serious diseases may be present) - this reflects the attenuation/depletion of an individual's un-turned life-force energy in the presence of the current universal energy. Additionally, and this is very concerning, allopathic chemical medicine continues to be less and less effective as time passes.

Consequently, it is needful for each individual to seek out the complementary therapies and medications that will synchronise with their personal life-force-energy resonance. The Four Keys to Longevity are an important resource which can aid to double a person's life span.

There are four simple keys that, when correctly applied, will promote longevity, and will empower your body to overcome disease. Each key can be applied individually, and will produce positive results; but, it is only when the four keys are used together in concert that the result of longevity, with better health, is fully manifested.

The Four Keys:

The First Key to health and longevity is simply Oxygen. Without oxygen the human organism dies; and with the correct application of oxygen, the human organism will not only live, but will live better, destroy disease, heal quicker, and dramatically live longer.

The Second Key to health and longevity links to the "elements of life". When Dr W H Schuessler (1821-1898) analyzed human blood and tissue, he found that there were ten essential constituent minerals. Moreover, with any imbalance of those minerals, the situation develops that is called "illness" or "disease". However, a normal balance of the twelve essential minerals can be re-established with the administration of the deficient mineral in a readily assimilated form, which passes rapidly into the bloodstream and then into the cells, and an augmented healing takes place.

The Third Key to health and longevity is to supply the missing links, the elements that the body cannot synthesize itself, to the body. Remember what Linus Pauling (1901-1994) said, "You can trace every

sickness, every disease, every ailment to mineral deficiency." This is where the third key comes in, and the application of vitamins and minerals to correct the deficiency and to effect wellbeing, healing, and to promote longevity.

The Fourth Key to health and longevity is rooted in the power of your subconscious mind. Dr Joseph Murphy (1898-1981) summed up the Fourth Key when he said: "Within your subconscious depths lie infinite wisdom, infinite power, and infinite supply of all that is necessary, which is waiting for development and expression... I have seen the power of the subconscious lift people up out of crippled states, making them whole, vital, and strong once more, and free to go out into the world to experience happiness, health, and joyous expression. There is a miraculous healing power in your subconscious that can heal the troubled mind and the broken heart. It can open the prison door of the mind and liberate you. It can free you from all kinds of material and physical bondage."

Thus, by releasing the power of your subconscious mind, you can attract all that you desire into your life, including health, abundance, and longevity.

By applying the four keys, especially at this time of convergent energy, the individual can create the Health, Wealth, Success, and Happiness that they desire.

However, moving on to another exciting development, those born after 1976 (the first true homo-spiritus children) have a natural (inbuilt genetic) synchronisation ability with the singularity, and they are consequently better able to access and directly use its transformative energy potential. Conversely, those born prior to 1976, if they want to explore and utilize the singularity's energy, they will have to adjust their personal life-force energy's fundamental frequency to synchronize exactly with one of the singularity's harmonics.

Meditation, Projection, Guided Visualisation, and Self-Hypnosis are typical methods to safely synchronise with, or be protected from, the singularity. A word of caution - substances should not be taken to try to effect synchronisation; however, if appropriate, standard psychic protection protocols can be used to effect protection from the singularity's possible negative effects.

For the less enlightened and the disinterested majority (two component groups of the goyim - "cattle" that makes up 98% of the human family) the singularity will affect them through the associated group's collective consciousness rather than on an individual basis; and consequently, social and personal restriction/control/manipulation/exploitation and directed personal/social change will continue to manifest unabated.

This particularly includes the elite's control and exploitation agenda (the elite are part of a group that constitutes 2% of the human collective, who directly own/control 98% of everything):

- The punitive exploitation of the masses by a delusional, corrupt, and self-serving political elite.
- The total manipulation of the political elite by a very focussed and self-aware financial and industrial elite.
- Additionally, there will continue the constant distraction of globally directed conflict for subversive and covert change through the industrial-/pharmaceutical-military elite. This group, has a strong 2nd Cohort signature, and creates and perpetuates unresolvable conflicts/wars/interventions (Middle East, Africa, Korea, Eastern Europe, etc), and restive social uprisings - Greece, Egypt, Africa, South America, Europe, etc. Look at the conflicts over the past 20 years, and one will readily see the signature of this elite group.

Additionally, the singularity represents an expected common-collective "new dawn" (not necessarily a "New Age"), and as such the dark side of mankind will be increasingly exposed/revealed - this is reflected in the increasing number of revelations brought forth by Whistle-blowers, Wikileaks and the like, Conspiracy commentators, Social commentators, Light Bearers, and countless others, etc. However, the good, yet also bad, news is that nations and peoples divided against themselves will not stand - Islam, Europe, United States, Africa, Korea, Russia, China, India, etc (basically all the major "societies"). "Reform" has been the mantra of mankind for decades, and it has done them little good - the new mantra, as revealed in the new energy unfoldment is "Transform", and things are now at a point where it is "transform" or face unsustainable political/social structures.

During this new cycle, the parasitical elite (Aristocrats, Theocrats, Plutocrats, Bureaucrats - the ego elite who have been eugenically conditioned to control) and their hidden agendas will be exposed; however, it will be to no immediate avail, and they will continue their uncontrolled and unaccountable exploitation and personal survival/growth agenda. Conversely, the parasitical sub-cultures (the bottom end of the goyim) will be squeezed to a point of cognitive anaesthesia, learned helplessness, existential devolution, and the possible subject of future eugenic programs. The problem is the rest of "productive" humanity, which is needed by the elite to "produce and provide", but who should not be allowed to think. Thus, through subtle elite manipulation of the media, food and water additives, GM, chemical exposure, and imposed "culturally accepted group norms and stereotyped personality profiles", etc, this important resource is kept subverted and are conditioned, often willingly, to be unable to differentiate reality from illusion/delusion. And thus shall it come to pass that the hewers of wood and the carriers of water shall continue to do so, unabated, unknowingly, and imperpetuum (forever is for a long time - and the 2nd Cohort have time to spare). As it is commanded, so shall it be.

In summary, the energy of the singularity portends dramatic personal and social challenges for the foreseeable future (Good or bad? Remember that from the esoteric existential perspective, there is no good or bad, there is only experiential reality), and Veritas illumination (the illumination and acceptance of objective reality) is the much needed antidote to the disease that is the human condition. Additionally, and in consequence of the June 21st singularity, the "hidden history" which was stored, all those aeons ago, within the genetic structure of the 1st Cohort, will now slowly emerge (don't forget the 22 keys which have always been in plain view) and become active. The great and final hope ("Remember") was that one day, this awakened memory would bring forth, over time, illuminators, teachers, healers, and confirmers who would more covertly than overtly, fulfil their self-determined, experiential reality that has lain dormant for so long... Shhhh... we can't say too much...

At long last it is truly a time of hope and possibility - and if reality prevails, the future is in good hands. If reality does not prevail, we will still illuminate.

There is much work for each individual to do, and it is very, very, good.

## 16 July 2013

The singularity energy continues to predominate and we continue to see a struggle for understanding, identity, and survival at all levels of existence. It is now a time and unfolding cycle of unprecedented illumination with many hidden things being revealed - especially the darker side of human nature (conscious beings achieving self-expansion through the restriction and exploitation of other conscious beings). It has always been the survival and greater experiential expansion of the fittest; whether on the home world or on earth; whether 100,000 year ago or today; whether in the caves or in the elite corridors of power - it is the same. And we, as a species, and we as evolved sentient beings, are at a time of a new beginning and potentially of a new understanding. In reality, all duality has symbolically converged into a unified energy-whole, and conscious self-determination, in wisdom and enlightenment, is the key to enable individuals (the microcosm) and the human collective (the macrocosm) to enter an undiscovered country of unlimited personally based existential experiential possibility.

The problem is that only 2% of 2% of the human collective have the cognitive motor primacy to understand this reality and to actually be able enter into its transformative flow. Additionally, if my analysis is accurate, the majority of the 2% of 2% only exist within the ranks of the elite (2nd Cohort?). Consequently, at this time (July 2013), the goyim (the specific human collective who are directed by, and who serve/support, the elite) will continue to function, as is, within the established structures, and "everything" will continue to unfold as it should. This is neither good nor bad, it just "is" - the collective experiential reality and potential of the individual conscious elements that constitute the human resource (us) - and it is the next level of existential reality that the elite will try to control and the goyim will blindly experience. However, and this is a cause of concern, a time of "evolutionary weeding" is dawning.

As the flow with the singularity energy, only one group will resist and will be unwilling/unable to synchronise, and that is the political elite - they are unable to adapt and as the parasites they are, they will die. What will the impact be? Not much - social adaption will produce a new self-determination. On the theocratic front, Islam will continue to devour itself, and will become less and less of an irritant.

The singularity energy has interesting harmonics that are reflected in the "Georgia Guidestones" in America:

- 1) Maintain humanity under 500,000,000 in perpetual balance with nature.
- 2) Guide reproduction wisely - improving fitness and diversity.
- 3) Unite humanity with a living new language.
- 4) Rule passion - faith - tradition - and all things with tempered reason.
- 5) Protect people and nations with fair laws and just courts.
- 6) Let all nations rule internally resolving external disputes in a world court.
- 7) Avoid petty laws and useless officials.
- 8) Balance personal rights with social duties.
- 9) Prize truth - beauty - love - seeking harmony with the infinite.
- 10) Be not a cancer on the earth - leave room for nature - leave room for nature.

Here we have illumination from unknown illuminators (supposedly the most evil of the evil elite) - however, it represents the resonant harmonics of the energy singularity and of a new direction. We are part of that new direction - and you and I, and those connected with us, will add to the illumination. What it all means will depend upon each individual, and each will respond in their own unique way - in any event, it is very close. Very, very, close...

End
